EXECUTIVE DECISION REPORT

Retail Sales Analytics & Strategic Recommendations

Prepared for C-Suite Decision Makers

Prepared by: Shruthi Nanubothu | 2026

Executive Summary

Net Revenue	Total Orders	AOV	Paid Order Rate
₹14,056.65	11	₹1,561.85	63.64%

Professional customers generated the highest revenue and average order value.

Course Access was the strongest revenue category.

3 of 11 orders were pending or failed, creating a payment recovery opportunity.

The analysis supports targeted growth, category expansion, and stronger operational controls.

Business Objective & KPIs

Gross Revenue
₹14,786.00

Net Revenue
₹14,056.65

Total Quantity
14

Average Discount
3.64%

Paid Orders
7

Pending Orders
2

Failed Orders
1

AOV
₹1,561.85

Data & Methodology

Dataset: cleaned retail order data containing 11 orders and 11 analytical fields.

Data preparation: reviewed missing values, duplicates, numeric fields, dates, discounts, and payment statuses.

Analysis: KPI calculations, segment/category/city aggregation, descriptive statistics, correlation, t-test, and ANOVA.

Business focus: identify revenue drivers, operational risks, and actionable opportunities.

Limitation: the small sample means findings should be treated as directional and validated with larger datasets.

Revenue Performance

Gross Revenue
₹14,786.00

Net Revenue
₹14,056.65

Net / Gross
95.06%

Net revenue remains close to gross revenue, indicating a relatively modest overall discount impact.

Average order value is ₹1,561.85 across the 11 orders.

Revenue performance is concentrated in a small number of high-value segments and categories.

Customer Segment Analysis

Professional
₹6,823.45

Average Order Value: ₹2,274.48

Student
₹4,735.20

Average Order Value: ₹1,183.80

Fresher
₹2,498.00

Average Order Value: ₹1,249.00

Professional is the strongest segment by both revenue and AOV.

ANOVA: F = 11.04, p = 0.00976, indicating statistically significant differences in average sales across segments.

Priority implication: protect and grow the Professional customer base.

Category & Geographic Analysis

Top Category
Course Access
₹5,546.30

Top City
Chennai
₹3,736.20

Top Category AOV
₹1,848.77

Course Access generated the highest category revenue, followed by Learning Kit and Mentor Session.

Chennai generated the highest city revenue across 3 orders.

Several cities have only one order, so geographic conclusions should be validated with more data.

Key Revenue Drivers

1

Professional customers

₹6,823.45 revenue | highest AOV

2

Course Access

₹5,546.30 category revenue

3

Chennai

₹3,736.20 city revenue

These drivers form the primary focus areas for growth initiatives, while the small sample requires validation before large-scale investment.

Risk Areas

Payment Risk	3 of 11 orders pending or failed (27.27%).
Revenue Concentration	Professional contributes about 48.54% of net revenue.
Category Concentration	Course Access contributes about 39.46% of net revenue.
Data Quality	Missing dates, quantities, city and revenue values affect reporting.
Sample Size	Only 11 orders; findings are directional.

Strategic Recommendations

Recommendation 1

Focus on Professional Customers

Create targeted offers, premium packages and retention campaigns for high-value customers.

Recommendation 2

Expand Course Access

Use bundles and cross-selling with Learning Kits and Mentor Sessions.

Recommendation 3

Reduce Payment & Data Risks

Follow up pending/failed payments and strengthen mandatory data validation.

ROI Projection

Scenario-based planning estimates, not guaranteed returns

Initiative	Revenue Impact	Cost	Net Benefit	ROI
Professional Segment	₹682.35	₹250	₹432.35	**172.94%**
Course Access	₹554.63	₹200	₹354.63	**177.31%**
Payment Recovery	₹2,023.65	₹300	₹1,723.65	**574.55%**

Assumptions: 10% uplift for Professional and Course Access; 50% recovery of pending/failed order value; illustrative implementation costs.

Implementation Roadmap & Final Decision

0–30 DAYS

Launch

Target Professional customers, promote Course Access bundles, start payment follow-up, enforce data validation.

31–60 DAYS

Optimize

Track campaign response, category sales, payment recovery and data quality.

61–90 DAYS

Scale

Expand successful campaigns, standardize recovery processes and review investment decisions.

FINAL DECISION

Prioritize high-value Professional customers, scale Course Access, and strengthen payment/data controls—then validate results with a larger dataset before major investment.
